- To avoid head injury, do not allow any child to play underneath the crib.
- Never add an accessory such as a bassinet or changing table that extends over the sleeping area.
- In Canada Only-Use a crib mattress that is no thicker than 15 cm and is of such a size that, when it is pushed firmly against any side of the crib, it does not leave a gap of more than 3 cm between the mattress and any part of the sides of the crib.
